Target Drug (TD) Good Faith Dispensing (GFD) Parameters Pilot

Tasha Polster
Director, Pharmaceutical Integrity

November 2012

Proprietary & Confidential. Property of Walgreen Co.

Agenda

Topics:

- Review Good Faith Dispensing Validation Procedures
- Target Drug GFD Parameters Overview
- TD GFD Parameters
 - Review updated policies & procedures
 - Checklist

Intended Outcomes:

- Reiterate the GFD Validation Procedure
- Introduce you to the new quantity limitations for all Target Drugs
- Understand the new procedures for dispensing these Target Drugs

Proprietary & Confidential. Property of Walgreen Co.

2

We'll start with a quick review of the GFD policy and then go into the new Target Drug GFD.

Review: Validation Procedures for TD GFD Parameters if Qty Fits

Validation Tools	Actions after Validation
<p>1. Patient ID</p> <ul style="list-style-type: none"> • Verify and Document ID at drop-off & pick-up <p>2. Prescriber</p> <ul style="list-style-type: none"> • Verify Prescriber DEA number via DEA Website • Verify Patient diagnosis code • Verify Rx is within MD Scope of Practice <p>3. PDMP</p> <ul style="list-style-type: none"> • Mandatory PDMP Review – staple to Rx • State specific <p>4. Data/DUR Review</p> <ul style="list-style-type: none"> • Review patient profile to resolve and document any associated DURs <p>5. Evaluate GFD guidelines</p> <ul style="list-style-type: none"> • Ensure usual course of professional practice • Verify noticeable trends with prescribers or patients • Verify prescriptions have not been altered or forged 	<p>6. Document</p> <ul style="list-style-type: none"> – GFD Checklist <p>7. RPh Action</p> <ul style="list-style-type: none"> – Determine how to proceed after using GFD guidelines: <ul style="list-style-type: none"> • Dispense • Not valid to dispense • Refuse to dispense – Document decision & retain all documentation with hard copy (or copy of Rx in case of refusal) <p>8. Notify DEA</p> <ul style="list-style-type: none"> – Notify local DEA office of refusal to fill if prescription is forged, altered or issued outside of usual course of professional practice or the prescription falls outside of the GFD policy in the pharmacist's professional judgment

Proprietary & Confidential, Property of Walgreen Co.

3

Let's review the updated validation procedures contained in the TD Good Faith Dispensing Policy. For the single entity TD of Oxycodone, Hydromorphone and methadone; if the prescription is being paid for by cash, the prescription cannot be for a quantity larger than 60. If the prescription is being billed to a 3rd party, the prescription cannot be written for a quantity greater than 120. If the parameter is not met, hand the prescription back to the patient and tell them "I am sorry but Walgreens no longer fills prescriptions for this medication for these large quantities. It cannot be filled here or at any Walgreens."

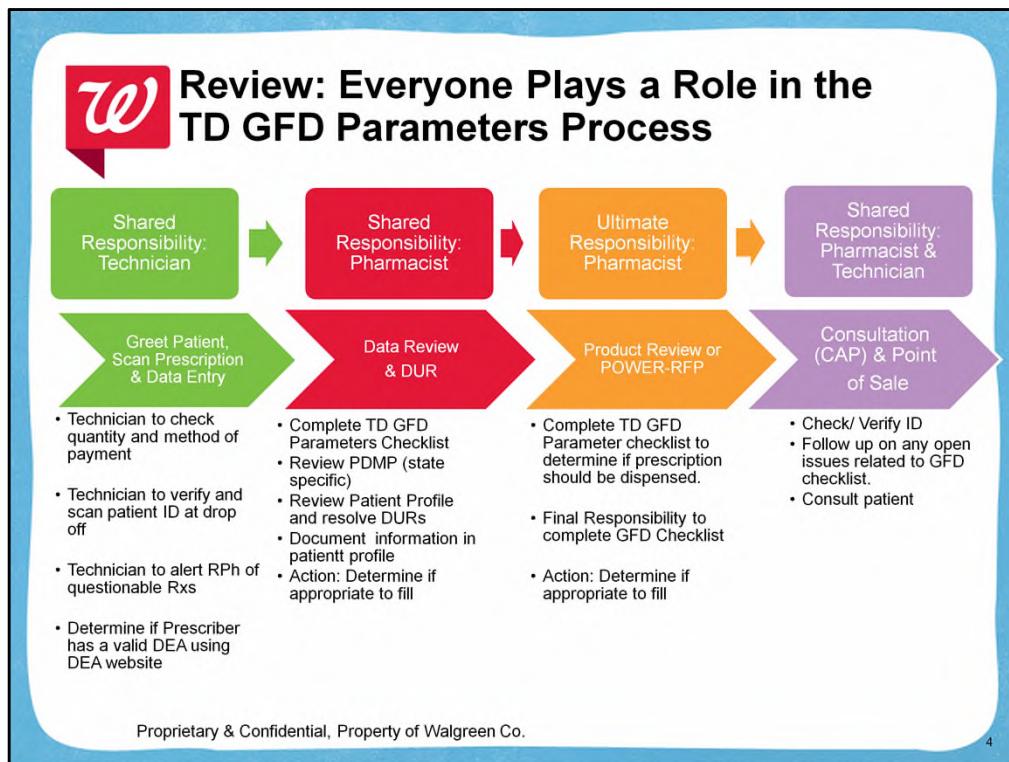

Review the validation steps:

The first 5 steps describe how pharmacy team members are able to determine the validity of a prescription. The last 3 are actions that should be completed after the initial validation steps. Every situation will not be the same. In some circumstances, you will use all GFD tools, however in other situations you may only need to use a few. We expect our pharmacists to use their professional judgment when dispensing controls and document accordingly.

If the TD prescription is written for a quantity within the parameters, Pharmacists shall use their professional judgment when determining if the elements of good faith are present prior to dispensing controlled substance prescriptions.

Please emphasize: The prescription must be valid and meet the elements of Good Faith for the prescription to be dispensed or the pharmacist should refuse to fill. Proper documentation is required. The local DEA office must be faxed within two business days for any refusals to fill. (Point 6, 7 and 8).

It is important that store leadership supports our pharmacists who make appropriate good faith dispensing decisions.

Now that we understand the validation steps for TD GFD Parameters, here is how everyone plays a role in the process.

Everyone in the pharmacy has a role in ensuring that the elements of Good Faith Dispensing are met. While all pharmacists and technicians have an obligation to assist with validation of Good Faith Dispensing requirements during the dispensing process, the **Product Review/RFP (Retail Fill Process) Pharmacist** has the ***ultimate responsibility*** for ensuring that the elements of Good Faith are present.

During the Product Review/RFP process, the pharmacist is attesting not only that the product is correct but also that Good Faith Dispensing guidelines have been validated and documented appropriately. The goal is that all elements of Good Faith Dispensing have been validated before getting to the Product Review/RFP Pharmacist. The Product Review/RFP Pharmacist should then be able to confirm the elements of Good Faith Dispensing have been met and continue with the dispensing process.

The goal is to have all elements of GFD confirmed throughout the filling process and prior to reaching the Product Review/RFP pharmacist.

POWER: Only a pharmacist should perform the RFP process for C-II's. Technicians should **not** perform RFP on CII's and must pass to a pharmacist to complete the RFP process.

Why are we doing this?

- The practice of pharmacy is changing and it is not enough to just put the right pill in the right bottle for the right patient.
- Walgreens wants to ensure that our patients continue to have access to the medications they need and are serious about our role in reducing abuse of controlled substances, while we do everything we can to help reduce the abuse of controlled pain medications

Proprietary & Confidential, Property of Walgreen Co.

5

Overview TD GFD Procedures

To prevent abuse of controlled substances, Walgreens is enhancing its Good Faith Dispensing procedures for certain drugs.

Additional policies and procedures are being put into place December 1 around Target Drugs. This will require:

1. Communication between stores in 'patient comments'
2. Communication to patients around additional processing time
3. Completion of TD GFD checklist for eligible prescriptions
4. Accountability

6

Additional processes are being put into place to protect our pharmacists and the company. The GFDP that you learned about over the summer has been updated to include dispensing practices that are uniform from store to store. This new policy was put into place in order to put a more rigorous and consistent process together in dispensing these Target Drugs. What we don't want to have happen is a prescription is refused at one Walgreen location only to be filled down the street at the next Walgreen location.

The target drugs we are going to begin with are the single entity Oxycodone, Hydromorphone and Methadone. With these products additional steps will need to be taken by the pharmacy staff.

Stores will be required to document in the patient comments that the prescription was filled or denied.

Patients will be required to give the pharmacy additional processing time to allow for the additional steps to be completed

TD GFD checklist will be required for every oxy, hydromorphone, methadone prescription
Failure to comply will lead to disciplinary action up to and including termination

My stores will just stop filling completely; they will tell the patients they don't carry the drug

All district and market leadership store visits will reinforce GFD. Leadership will need to be looking through the "refusal file" and the file of filled CII prescriptions, and should look for:

Refusals

- Copies to the DEA of the faxed rx, TD GFD checklist, and paperwork documentation

Filled

- TD GFD checklist and paperwork documentation attached to filled oxycodone, hydromorphone, and methadone prescriptions in the CII files

Proprietary & Confidential, Property of Walgreen Co.

7

It is unlikely that a full time pharmacist at that store would not dispense or refuse even one of these medications during the time between your visits to the stores. As district/market leaders, you will need to play an active role during your supervision visits to reinforce GFD and to ensure that the TD GFD is being followed.

TD GFD Parameters Procedures

Proprietary & Confidential. Property of Walgreen Co.

8

When to follow TD GFD Parameters:

What defines a Target Drug (TD) for this policy?

- TD is a single ingredient C-II drug, in the family of:
 - Oxycodone
 - Hydromorphone
 - Methadone

Will every prescription for these TD require new steps?

- Yes

What are the new required steps?

- Pharmacy staff must ensure the quantity written fits within the policy
- Complete the checklist for these prescription

9

For this policy we are targeting just the single ingredient Oxy, Hydromorphone and Methadone (brand and generics) products. Every prescription for these medications will require these new parameters. No prescriptions written for quantities greater than 120 if paid for by 3rd party, or 60 if paid for by cash or a cash discount card will be filled. The TD GFD Parameters checklist will need to be completed, attached to the prescription or the refusal copy and a message will need to be entered into the patient's comment. Additionally, any refused prescription must be faxed to the DEA and the documentation of such action retained in the "refusal folder".

If a prescription does not meet the quantity parameter, hand the prescription back so the patient can take it elsewhere. If the prescription is written with the proper quantity to fit the parameter and does not meet GFD, fax the prescription to the DEA per GFD guidelines.

TD GFD Parameters Checklist

Patient Name: _____	Date: ____/____/____																								
Rx # _____																									
Do not fill for quantities greater than what is listed below. Any prescription presented with larger quantities must be returned to the patient with the following statement: "I am sorry, Walgreens no longer fills for the quantity indicated on this prescription." Note: Do not fill the prescription for a reduced quantity Return prescription to patient, do not deface prescription																									
Complete the checklist Quantity is 60 units or less + cash or cash discount card <input type="checkbox"/> Quantity 120 units or less <input type="checkbox"/>

10

Checklist will be posted on SNet, stores will need to print out copies to have ready to use.

Checklist

TD GFD Parameters Checklist	
Patient Name: _____	Date: ____/____/____
Rx # _____	
<p>Do not fill for quantities greater than what is listed below.</p> <p>Any prescription presented with larger quantities must be returned to the patient with the following statement: "I am sorry, Walgreens no longer fills for the quantity indicated on this prescription."</p> <p>Note: Do not fill the prescription for a reduced quantity</p> <p>Return prescription to patient, do not deface prescription</p>	
<p>Complete the checklist</p> <p>Quantity is 60 units or less + cash or cash discount card <input type="checkbox"/></p> <p>Quantity 120 units or less <input type="checkbox"/></p> <p>Drug & Strength (please select one, and input the appropriate strength) tablets/capsules only</p> <p><input type="checkbox"/> Oxycodone _____</p> <p><input type="checkbox"/> Hydromorphone _____</p> <p><input type="checkbox"/> Methadone _____</p>	

Proprietary & Confidential, Property of Walgreen Co. 11

No prescription can be accepted for quantities larger than what is indicated on the checklist.

Checklist (cont.)

• A completed checklist is required for every prescription written for a TD with quantities >120 units if paid by 3rd Party or >60 if paid by cash or cash discount card

	Yes	No	Mandatory Prescription Requirements (must be Y to fill prescription)	RPh/Tech Initials
1	<input type="checkbox"/>	<input type="checkbox"/>	Valid government issued photo ID presented (printed image attached to hard copy) If eRx, copy must be obtained during pick-up.	
2	<input type="checkbox"/>	<input type="checkbox"/>	PDMP, must not have poly pharmacy/poly prescriber, print report (retain in a separate file) state specific	
3	<input type="checkbox"/>	<input type="checkbox"/>	Validated Prescriber's DEA number via DEA website	
4	<input type="checkbox"/>	<input type="checkbox"/>	Patient &/or prescriber is in the immediate trade area of pharmacy	
5	<input type="checkbox"/>	<input type="checkbox"/>	Patient not paying cash if 3 rd Party Insurance is available	
I attest that I have utilized the GFD Parameter Checklist validation procedures to review this prescription and I have <input type="checkbox"/> Dispensed Product review Pharmacist signature _____ <input type="checkbox"/> Refused (RPh must fax a copy of the refused Rx Hard Copy to DEA. FL use webform) Pharmacist signature _____				

Proprietary & Confidential, Property of Walgreen Co.

12

Calls to the prescriber are required for every patient per prescriber and target drug. We know these calls may be uncomfortable and unwelcome, so we have put together some tools to help the pharmacists. Prescriber talking points have been provided as well as a Pain Management document. That document was put together by our CMO office and has clinical information that the pharmacists may find helpful around pain management.

Checklist (cont.)

- Required for ALL target drugs, both dispensed and refused. A pharmacist signature validates the checklist in both instances:

I attest that I have utilized Good Faith Dispensing Checklist validation procedures to review this prescription and I have

Dispensed
Product review Pharmacist signature _____

Refused (RPh must fax a copy of the refused Rx Hard Copy to DEA)
Pharmacist signature _____
- A checklist with signature must be attached to all hard copies, there are exemptions that allow the phone call to the prescriber to be bypassed:
 - Quantity is less than 50 units and less than a 10 days supply

However, pharmacists should call the prescriber anytime they feel a call is warranted

Proprietary & Confidential, Property of Walgreen Co. 13

There will need to be documentation for both filled and refused prescriptions in the store. The market and district leadership will be looking for this on store visits.

It is going to be okay for a pharmacist to refuse to fill a prescription based on the elements of the checklist and their professional judgment. And they need to know they have both corporate and leadership's support on this. However, they cannot just tell the patients that they are out of stock or they don't fill for this drug.

How will you know, you ask? It would be unlikely that a full-time RPh at a store would not fill/refuse any of these products in the amount of time between your store visits. When you look through the files, there should be documentation from each RPH that works at that location. We will need full support of RXS, DM and if you'd like to roll down to CL level, on this. GFD should be part of each supervision visit.

Patient Identification at Drop Off

- Government issued photo ID is required for all Target Drugs. Scan and print image of photo ID, attach to checklist
- Patient and/or prescriber must be in the geographic proximity to the Walgreens store or have a valid reason for not being nearby

Proprietary & Confidential, Property of Walgreen Co.

14

So, here is how it's going to look in the store, if the prescription is written for the appropriate quantity, the tech gets accepts the rx and they will request a photo ID which they will scan and print a copy of.

If the quantity does not meet the parameters, the prescription is to be returned to the patient with "I am sorry, Walgreens no longer fills prescriptions for this medication for large quantities."

PDMP (State Specific)

- Access PDMP
 - If there is a state PDMP, all pharmacists are required to know how to access the report
 - Comply with your state's PDMP requirements
- Review, print and attach to the checklist
- States that do not have a PDMP will rely on the standard verification procedures as outlined in the TD GFD
 - AR, DC, GA, MD, MO, NE, NH, PR, WI- do not have PDMP
 - NY, PA, WY – do not have on-line access with their PDMP

Note: Patient should never receive a copy of his/her PDMP Report

Proprietary & Confidential, Property of Walgreen Co.

15

Mandatory use of the PDMP website is required where PDMP is available. Every pharmacist must know how to access the PDMP and print a report for every TD prescription **by patient**

Prescriber Validation

- Confirm Prescriber's DEA license is valid/active via DEA website (<https://www.deadiversion.usdoj.gov/webforms/validateLogin.jsp>)
- Verify patient and/or prescriber address is within the geographic area.

Proprietary & Confidential, Property of Walgreen Co.

16

Dispensing and Selling TD Prescriptions

- If all points of the checklist are complete, the pharmacist can sign at the bottom and continue product review
- Attach the checklist and all documentation to the hard copy

Proprietary & Confidential, Property of Walgreen Co.

17

Denied Filling of Prescription

Do Not Deface Prescription

All documentation around the denied prescription fill must be placed in the "refusal" folder

1. Copy of the refused prescription (give original back to patient)
2. PDMP report
3. Printed image of Government issued ID presented with prescription
4. Checklist
5. Any other documentation collected during the validation process
6. Documentation of notifying the DEA within 2 days of refusal to fill

Refusal message: "Walgreens is working hard to ensure the safe dispensing of controlled pain medications. Based on my clinical review and professional judgment, this prescription does not meet the requirements we have put in place for dispensing these medications. Therefore, we cannot fill this prescription in good faith at this or any Walgreens. I apologize for any inconvenience."

Proprietary & Confidential, Property of Walgreen Co. 18

If the quantity meets the parameter guidelines for the policy, but the prescription does not meet GFD it is very important that the pharmacy staff not deface the prescriptions that they refuse to fill. Writing comments like "doctor under investigation" or other slanderous memos are not authorized. It is going to be a delicate situation as well, because there may be times where it is difficult to tell the legitimate pain patient, therefore delivering the refusal message is very important.

"Walgreens is working hard to ensure the safe dispensing of controlled pain medications. Based on my clinical review and professional judgment, this prescription does not meet the requirements we have put in place for dispensing these medications. Therefore, we cannot fill this prescription in good faith. I apologize for any inconvenience."

Accountability

An incident is defined as any failure to comply with the GFD and TD GFD policies and procedures. In cases of serious misconduct, it may be necessary to escalate to a higher level of discipline in this process, up to and including termination.

- **Step 1 (VERBAL COUNSELING)**

- Review GFD policy and procedures with the pharmacist
- Review the TD GFD Parameters policy and procedures with the pharmacist
- Review GFD and TD GFD Parameters training materials (powerpoint, policies/procedures)

- **Step 2 (WRITTEN WARNING)**

- Issue written warning to pharmacist
- Re-assign and acknowledge the GFD
- Review GFD and TD GFD Parameters training materials (powerpoint, policies/procedures)
- Use the GFD and TD GFD Parameters training materials to develop an action plan for compliance with the GFD process

- **Step 3 (FINAL WRITTEN WARNING)**

- DM and RXS to Issue the final written warning to the pharmacist
- The pharmacist should be suspended for one work week coinciding with the pay week and be moved from his/her current location

- **Step 4 (TERMINATION)**

**Discipline is active for a rolling 12-month period from the date the discipline is issued to a team member. If more than 12 months have elapsed since issuance of discipline, repeat the prior discipline step.*

All documentation related to GFD discipline process must be entered into the Talent Management Portal as discipline for misconduct.
Proprietary & Confidential, Property of Walgreen Co.

Supporting Documents

- Powerpoint
- TD GFD Parameters checklist
- TD GFD policy
- Talking Points for patients, prescribers and managers

Proprietary & Confidential, Property of Walgreen Co.

20

Next Steps

- **Review and familiarize yourselves with**
 - TD GFD checklist
 - New Target Drug GFD policy
 - Talking points for patients and prescribers
 - **Ensure all stores have a “refused” folder**
 - Ensure staff is notifying DEA for every prescription they refuse to fill (not just fake/forged rx's)
- **Communicate to your stores for an ASAP start**

Proprietary & Confidential, Property of Walgreen Co.

21

Additional Questions?

- Wait until all questions are submitted and put into one email
- Email: Tasha.Polster@walgreens.com
- All questions will be answered and communicated together

Proprietary & Confidential, Property of Walgreen Co.

22

Follow Up

- Keep notes of feedback of what's working, what's not working
- On store visits, review filled CII prescriptions for documentation as well as the refusal folder for documentation
- Another conference call will be scheduled with for feedback

Proprietary & Confidential, Property of Walgreen Co.

23
